

Proceedings of
**The Third International Workshop
for Far East Asian Young Rheologists**

January 25-27, 2008

Shanghai Jiao Tong University
Huashan Road 1954, Shanghai 200240, China

Participating Schools:

Korea University
Seoul National University
Sungkyunkwan University
Suwon University
Kitakyushu University
Kyoto Institute of Technology
Kyoto University
Kyushu University
Nagoya Institute of Technology
Osaka University
Yamagata University
Fudan University
Institute of Chemistry, Chinese Academy of Sciences
Shanghai Jiao Tong University
Yangzhou University

Organizing Institutes:

Advanced Rheology Institute,
Shanghai Jiao Tong University
Institute for Chemical Research,
Kyoto University
Brain Korea 21 in Chemical Engineering
Seoul National University

Organizers:

Wei Yu (SJTU)
Kang Sun (SJTU)
Hiroshi Watanabe (KU)
Kyun Hyun Ahn (SNU)

This workshop is partly supported by China
National Natural Science Foundation.

Session II (Chairman: V. Vao-soongnern (*Suranaree Univ Tech*))

	page
10:55-11:10 Effect of Viscoelasticity on Single Screw Extrusion for Polyethylene Azusa NAOI (<i>Kyoto Univ</i>)	5
11:10-11:25 Normal Stress Difference of Viscoelastic Fluids under Large Amplitude Oscillatory Shear (LAOS) Flow Jung Gun NAM (<i>Seoul Nat'l Univ</i>)	6
11:25-11:40 Rheological Studies on the Flow-Induced Crystallization of Isotactic Polypropylene: Experiments and Modeling Fengyuan YU (<i>Shanghai Jiao Tong Univ</i>)	7
11:40-11:55 Dynamics and Stability of Film Blowing with Flow-Induced Crystallization Dong Myeong SHIN (<i>Korea Univ</i>)	8
11:55-13:00 Lunch	

Session III (Chairman: H. Watanabe (*Kyoto Univ*))

13:00-13:15 Rheological Properties of Novel Silk Fibroin Fiber/ Poly (ϵ -caprolactone) Biocomposites Wei LI (<i>Shanghai Jiao Tong Univ</i>)	9
13:15-13:30 Effect of Electric Discharge on Beads Formation in Electrospinning of Poly(vinyl alcohol) Yosuke KADOMAE (<i>Yamagata Univ</i>)	10
13:30-13:45 Characterizing Microstructure of Extracellular Polymeric Substances (EPS) Using Particle Tracking Microrheology Heekyoung KANG (<i>Seoul Nat'l Univ</i>)	11

Session IV (Chairman: Z. G. Wang (*Inst Chem, Chinese Academy Sci*))

13:45-14:00 Hydration Structure and Dynamic Behavior of Poly(vinyl alcohol)s in Aqueous Solution Yuichi SATOKAWA (<i>Osaka Univ</i>)	12
14:00-14:15 Spreading of non-Newtonian Droplets on Glass Surfaces with Controlled Wettability Yangsoo SON (<i>Korea Univ</i>)	13
14:15-14:30 Magnetic Orientation of Lamellar Microdomains in which Iron-Chelate Compound was Selectively Doped Akifumi YASUI (<i>Kyoto Inst Tech</i>)	14
14:30-14:45 Tea Break	

Session V (Chairman: Y.D. Kwon (Sungkyunkwan Univ))

page

- 14:45-15:00 Effect of Blended Nano-Clay on Crystallization and
Ferroelectricity in Poly(vinylidene fluoride)
Eiji YAMADA (*Yamagata Univ*) 15
- 15:00-15:15 Relations of Percolation between Rheology, Electrical and
Magnetic Properties of High-Temperature Resin Magnetic
Composites
Lanfeng WU (*Yangzhou Univ*) 16
- 15:15-15:30 Dielectric Relaxation of Guest Homopolyisoprene
Constrained in Spherical Domain Formed by Styrene-
Isoprene-Styrene Triblock Copolymer
Tomohito IWAMOTO (*Kyoto Univ*) 17

Session VI (Chairman: T. Taniguchi (Yamagata Univ))

- 15:30-15:45 The Effect of Rheological Properties of Concentrated
Suspensions on Screen Printing Process
Joo Young LEE (*Seoul Nat'l Univ*) 18
- 15:45-16:00 Transient Behavior of Highly Concentrated Aluminum
Powder Slurries
Ying GUO (*Shanghai Jiao Tong Univ*) 19
- 16:00-16:15 Effect of Process Conditions on the Performance of PEMFC
Hye Yeon PARK (*Korea Univ*) 20

16:30-18:30 **Poster Session**

18:30-20:30 **Reception**

2008/1/26 (Saturday)

Session VII (Chairman: K.H. Ahn (*Seoul Nat'l Univ*))

		page
9:00-9:15	Rheological Properties and Structure of Styrene-Isoprene Block Copolymer in Monomeric and Polymeric Selective Solvents Masafumi YAMAMOTO (<i>Kyoto Univ</i>)	21
9:15-9:30	Mutual diffusion at interface of polyolefin plates probed by rheological measurement Liang YANG (<i>Inst Chem, Chinese Acad Sci</i>)	22
9:30-9:45	Fabrication of Photonic Crystals from a Dilute Solution of a Ultra-High-Molecular-Weight Block Copolymer and its Immobilization by Gel Formation for Optical Applications Tatsuhiko IWAMA (<i>Nagoya Inst Tech</i>)	23
9:45-10:00	Atomistic Structure and Ionic Mobility of Sulfonated Polystyrene Ionomers by Molecular Simulation and X-Ray Absorption Spectroscopy Khongvit PRASITNOK (<i>Suranaree UnivTech</i>)	24
10:00-10:15	Tea Break	

Session VIII (Chairman: Z. Z. Shao (*Fudan Univ*))

10:15-10:30	Conformation of Single Polymer Chains in Coating Flows Jeong Yong LEE (<i>Korea Univ</i>)	25
10:30-10:45	Direct Observation of DNA Dynamics in Aqueous Solutions in Presence/Absence of Suspended Solid Particles Hiroki SATO (<i>Kyoto Univ</i>)	26
10:45-11:00	The Effect of Applied Oscillatory Frequency on the Degrading Behavior of Melt Polyolefin Elastomer (POE) with Dicumyl Peroxide (DCP) in Oscillatory Shear Flow Jianye LIU (<i>Shanghai Jiao Tong Univ</i>)	27

Session IX (Chairman: T. Inoue (*Osaka Univ*))

		page
11:00-11:15	Component Dynamics in Polyisoprene/Poly(4-tert-butyl styrene) Miscible Blends Quan CHEN (<i>Kyoto Univ</i>)	28
11:15-11:30	Characterizing Low Viscosity Complex Materials for Inkjet Printing System Nahn Ju KIM (<i>Seoul Nat'l Univ</i>)	29
11:30-11:45	Rheology Control of Foaming Slurries for High-Porosity β -TCP/ CPP Bone Scaffold Gaoxiang CHEN (<i>Shanghai Jiao Tong Univ</i>)	30
11:45-13:00	Lunch	
13:00-18:00	Free Discussion	
18:00-20:00	Dinner	

2008/1/27 (Sunday)

Session X (Chairman: K. Sun (*Shanghai Jiao Tong Univ*))

		page
9:00-9:15	A Free Energy of Entangled Polymer Networks with Non-bonding Interactions Kazushi HORIO (<i>Kyoto Univ</i>)	31
9:15-9:30	The Effect of Structural Heterogeneity on Stress Development during Film Formation of Polymer/Silica Suspension Sunhyung KIM (<i>Seoul Nat'l Univ</i>)	32
9:30-9:45	Dielectric Relaxation and Dynamics of Poly(lactic acid) in Carbon Dioxide at High Pressure Tatsuya IWASHIGE (<i>Kyoto Univ</i>)	33
9:45-10:00	Preparation of Lamellar Microdomains Having Invariant Spacing Against Temperature Change Junji FUKUHARA (<i>Kyoto Inst Tech</i>)	34
10:00-10:15	Tea Break	

Session XI (Chairman: Y. Masubuchi (Kyoto Univ))

	page
10:15-10:35 An Overview of Rheology and Polymer Research in Thailand Visit VAO-SOONGNERN (<i>Suranaree Univ Tech</i>)	35
10:35-10:50 Dielectric and Viscoelastic Relaxation of polystyrene and 4-pentyl-4'-cyanobiphenyl Blends S. NOBUKAWA (<i>Osaka Univ</i>)	36
10:50-11:05 A Rapid Method to Predict Sedimentation in Commercial Water Base Coatings Kai YANG (<i>Shanghai Jiao Tong Univ</i>)	37

Session XII (Chairman: H. W. Jung (Korea Univ))

11:05-11:20 Viscoelastic Effect on Drop Deformation in 5:1:5 Contraction/Expansion Channel Changkwon CHUNG (<i>Seoul Nat'l Univ</i>)	38
11:20-11:35 The Rheological Properties of the Suspension of RSF Microsphere During Its Gelation Jianchuan WEN (<i>Fudan Univ</i>)	39
11:35-11:50 Nonlinear Viscoelastic Behavior of Scarcely Crosslinked Poly(dimethyl siloxane) Gel Hideaki TAKAHASHI (<i>Kyoto Univ</i>)	40
11:50-12:00	Closing Remarks
12:00-13:00	Lunch

Poster Presentation

		page
P1	Long Time Dynamics of Linear and Cyclic Poly(ethylene oxide) Chains by Novel Monte Carlo Simulation Kesorn MERAT (<i>Suranaree Univ Tech</i>)	41
P2	Mesoscale Simulation of PEO-PPO-PEO Tri-block Copolymer Self-Assembly in Aqueous Solution Mantana CHANSUNA (<i>Suranaree Univ Tech</i>)	42
P3	Particle Dynamics in the Viscoelastic Medium under Steady and Oscillatory Shear Flow Jeong Ah LEE (<i>Seoul Nat'l Univ</i>)	43
P4	Particulate Flow in Complex Geometry during ACF Assembly Hyunsup LEE (<i>Seoul Nat'l Univ</i>)	44
P5	Asymmetric Translational Motion of Free Particles near a Wall Duwon CHOI (<i>Seoul Nat'l Univ</i>)	45
P6	The Sensitivity Analysis of 2D Film Casting Process Seung Won CHOI (<i>Korea Univ</i>)	46
P7	Stability and Frequency Response of Slot Coating Flow Bo Kyung RYU (<i>Korea Univ</i>)	47
P8	Thermal Conductivity and Rheological Properties of Nanofluids Seok-Won KIM (<i>Korea Univ</i>)	48
P9	Stripe Formation in a Mixture of Spheres with Differing Densities under Horizontal Vibration Jae Bum JUNG (<i>Korea Univ</i>)	49
P10	Dynamics of Butadiene-Styrene-Butadiene Triblock Copolymer during Elasticity Recovery after Cessation of Flow Satoshi TANAKA (<i>Kyoto Univ</i>)	50
P11	Effect of Molecular Weight of PEG on the Aggregation Structure in DNA/PEG Solutions Hiroshi KAWAKITA (<i>Kyoto Univ</i>)	51
P12	Comparison of Viscoelastic and Rotational Relaxations of E.coli Genome DNA Taro KINOSHITA (<i>Kyoto Univ</i>)	52
P13	Investigation for Impact Resistance of Recycled Polyethylene Terephthalate Akira TAKAGI, Jun TAKADA (<i>Kyoto Univ</i>)	53

	page
P14	Smoothed Particle Hydrodynamics for Rheological Phenomena Takahiro MURASHIMA (<i>Yamagata Univ</i>) 54
P15	Phase Behavior and Its Viscoelastic Responses of Immiscible Bidegradable Polymer Blends Yisheng ZHANG (<i>Yangzhou Univ</i>) 55
P16	The relationship between Rheological and Morphological properties for semi-concentrated immiscible polymer blends Qi HE (<i>Shanghai Jiao Tong Univ</i>) 56
P17	Experimental and numerical study on kinetics of polyethylene combination reaction initiated by Dicumyl peroxide under strong flow conditions of Haake internal mixer Ji ZHOU (<i>Shanghai Jiao Tong Univ</i>) 57
P18	The influence of long chain branching and supercritical carbon dioxide on the formation of γ -crystal in polypropylene Ruogu LIAO (<i>Shanghai Jiao Tong Univ</i>) 58
P19	Microwave absorbing properties of polyaniline/montmorillonite nanocomposite doped with dodecylbenzensulfonic acid Peng WANG (<i>Shanghai Jiao Tong Univ</i>) 59
P20	Influences of powder-to-liquid ratio and compositions of mixing liquids on rheological properties of calcium phosphate cements Xiaoming YU (<i>Shanghai Jiao Tong Univ</i>) 60
P21	Morphology and Gelation of Silk Fibroin Hydrogels Formed in Ethanol Solution Zuguang GONG (<i>Fudan Univ</i>) 61
P22	Mesoscale Modeling of Complex-structure Fluid with Dissipative Particle Dynamics Shuo CHEN (<i>Tongji Univ</i>) 62
P23	Elastic Properties of Sodium Polyalginate/Gelatin Interpenetrated Networks Yoshiaki TAKAHASHI (<i>Kyushu Univ</i>) 63
P24	A Rapid Method to Predict Sedimentation in Commercial Water Base Coatings Kai YANG (<i>Shanghai Jiao Tong Univ</i>) 37
